CASE NO. 5:14-cv-05344-BLF

**PLAINTIFF CISCO SYSTEMS, INC.'S
 SUPPLEMENTAL OBJECTIONS AND
 RESPONSES TO DEFENDANT
 ARISTA NETWORKS, INC.'S
 INTERROGATORY NOS. 16 AND 19**

25
 26
 27
 28

1 Pursuant to Rules 26 and 33 of the Federal Rules of Civil Procedure, Plaintiff Cisco
2 Systems, Inc. (“Cisco”), by counsel, hereby provides its supplemental objections and responses to
3 Defendant Arista Networks, Inc.’s (“Arista’s”) Interrogatory Nos. 16 and 19.

4 **GENERAL OBJECTIONS**

5 Cisco makes the following general objections to Arista’s Interrogatories, which apply to
6 each interrogatory regardless of whether the general objections are specifically incorporated into
7 the specific objections and responses below.

8 1. Cisco is responding to each interrogatory as it interprets and understands each
9 interrogatory with respect to the issues in this Litigation. If Arista asserts a different interpretation
10 of any interrogatory, Cisco reserves the right to supplement or amend its responses or objections.

11 2. Cisco objects to each interrogatory to the extent it is inconsistent with or seeks to
12 impose obligations beyond those imposed by the Federal Rules of Civil Procedure, the Civil and
13 Patent Local Rules of the Northern District of California, and any orders governing this Litigation.

14 3. Cisco objects to the definitions of “Cisco,” “You,” and “Your,” to the extent that
15 the definitions are overly broad and purport to require Cisco to provide information that is not
16 within the possession, custody, or control of Cisco.

17 4. Cisco objects to Arista’s definition of “Asserted Patents” and “Asserted Claim” to
18 the extent that Arista’s use of those terms in its interrogatories to Cisco renders certain of Arista’s
19 Interrogatories as constituting multiple discrete subparts that are in fact multiple, separate
20 interrogatories.

21 5. Cisco objects to the definitions of “CLI Command” and “Network Management
22 Product” to the extent that these terms are vague and ambiguous with respect to their scope and
23 application as used by Arista, rendering these terms at least potentially unclear with respect to
24 what particular devices are intended to be incorporated thereby, and further on the grounds that
25 use of the terms in Arista’s Interrogatories renders those interrogatories overbroad and unduly
26 burdensome to the extent that the discovery sought by such interrogatories is not reasonably tied to
27 Cisco’s claims or Arista’s defenses in this Litigation. Cisco further objects to the use of these
28

1 terms in Arista's Interrogatories to the extent that such interrogatories are not reasonably
2 calculated to lead to the discovery of admissible evidence.

3 6. Cisco objects to the definition of "Relating to" as vague and ambiguous and overly
4 broad, unduly burdensome, and further to the extent that interrogatories using such terms are not
5 reasonably calculated to lead to the discovery of admissible evidence.

6 7. Cisco objects to the definition of "Identify" and the instructions set out in
7 Paragraphs 10–12 as overly broad, unduly burdensome, and further to the extent that
8 interrogatories using such terms are not reasonably calculated to lead to the discovery of
9 admissible evidence. Cisco further objects to these definitions and instructions to the extent that
10 the burden of deriving or ascertaining the requested information is substantially the same for
11 Arista as it is for Cisco.

12 8. Cisco objects to each and every interrogatory as overly broad, unduly burdensome,
13 cumulative, and duplicative to the extent it seeks identification of "any," "each," or "all"
14 documents of a specified type or nature, when a subset of such documents will provide the
15 requested information. Cisco objects generally to each and every interrogatory as overly broad,
16 vague and ambiguous, and not reasonably calculated to lead to the discovery of admissible
17 evidence, to the extent that it seeks information regarding "any," "each," or "all" persons, entities,
18 objects, or events.

19 9. Cisco objects to the "Definitions" and "Instructions" of the Interrogatories to the
20 extent they alter the plain meaning of any specific interrogatory and render the interrogatory
21 vague, ambiguous, and overbroad.

22 10. Cisco objects to each interrogatory to the extent that it is unlimited in temporal
23 and/or geographic scope, or to the extent it would require Cisco to provide information or
24 documents in violation of an applicable foreign law or regulation.

25 11. Cisco objects to each interrogatory to the extent that it is overbroad, unduly
26 burdensome, and/or calls for provision of information or documents that are neither relevant to
27 any claim or defense in this litigation nor reasonably likely to lead to the discovery of admissible
28 evidence.

1 12. Cisco objects to each interrogatory to the extent that it calls for production of
2 information or documents that are not within the possession, custody, or control of Cisco, or to the
3 extent the interrogatory seeks information that may not be disclosed pursuant to a protective order
4 or non-disclosure agreement, or calls for Cisco to prepare documents and/or things that do not
5 already exist.

6 13. Cisco objects to each interrogatory to the extent that it calls for production of
7 information or documents that are publicly available or equally available to Arista, and therefore
8 are of no greater burden for Arista to obtain than for Cisco to obtain.

9 14. Cisco objects to each interrogatory as overbroad and unduly burdensome to the
10 extent that it is not limited to a time frame relevant to this Litigation or seeks information or
11 documents not within the applicable scope of this Litigation.

12 15. Cisco objects to each interrogatory to the extent it seeks information or documents
13 that Cisco is not permitted to disclose pursuant to confidentiality obligations to third parties or
14 court order. Cisco will provide such responsive, relevant, and non-privileged information and/or
15 produce documents in accordance with the Protective Order governing this Litigation and after
16 complying with its obligations to the third party and/or court.

17 16. Cisco objects to each interrogatory to the extent it seeks information, documents,
18 and/or things protected from disclosure by the attorney-client privilege, work-product doctrine,
19 common-interest privilege, and/or any other applicable privilege, immunity, doctrine, or
20 protection, including without limitation in connection with the common interest doctrine
21 (collectively, as used herein, "privileged"). Nothing contained in these objections and responses
22 should be considered a waiver of any attorney-client privilege, work-product protection, or any
23 other applicable privilege or doctrine, including in connection with the common interest doctrine.
24 Cisco does not intend to provide information or produce documents that would divulge any
25 privileged information. Any such disclosure is inadvertent and shall not be deemed a waiver of
26 any applicable privilege or immunity.

27 17. Cisco objects to Arista's Interrogatories to the extent that their subparts exceed the
28 number of interrogatories permitted under the Federal Rules of Civil Procedure, including Rule

1 33(a)(1), the Civil and Patent Local Rules of the Northern District of California, and any orders
2 governing this Litigation.

3 18. Cisco objects to each interrogatory to the extent that it is vague, ambiguous, or
4 confusing due to Arista's failure to define terms or failure to describe the information or
5 documents sought with reasonable particularity.

6 19. Cisco objects to the factual characterizations of Arista's Interrogatories. By
7 responding, Cisco does not accept or admit any of Arista's factual characterizations.

8 20. Terms or phrases with specific legal significance appear in many of Arista's
9 Interrogatories. Neither Cisco's objections and responses, nor the provision of information or
10 production of documents in response to any interrogatory, are an admission or indication that such
11 information and documents are relevant to any legal theory, or that any of the legal terms used
12 have any applicability in their legal sense to any information or documents produced by Cisco in
13 response to the Interrogatories.

14 21. Cisco objects to these Interrogatories on relevance and burden grounds to the extent
15 they are not limited in temporal scope, or to the extent that time period specified encompasses
16 time periods not relevant to this Litigation, or to the extent the requests are not limited in
17 geographic scope.

18 22. Cisco objects to the Interrogatories as overly broad and unduly burdensome to the
19 extent they call for the provision of information or production of documents of technical
20 information, or otherwise, including source code, in connection with Cisco's products, where such
21 information or documents are either duplicative of other documents or information that will be
22 produced and/or are not relevant to this Litigation and Cisco's products relevant to this Litigation.
23 Cisco further objects to the Interrogatories to the extent that they call for the provision of
24 information or production of documents of technical information, or otherwise, including source
25 code, in connection with Cisco's products, where such information and documents are not
26 necessary to understand the relevant structure, function, and operation of Cisco's products relevant
27 to this Litigation.

28

23. Cisco objects to each interrogatory as premature to the extent it calls for documents or information that is the subject of later disclosure deadlines in this Litigation and/or expert reports and testimony, including as set forth in Rule 26(a)(2) of the Federal Rules of Civil Procedure, the Patent Local Rules of the Northern District of California, and the Case Management Order entered in this Litigation.

24. Any Cisco response that it will provide information or produce documents should not be construed to mean that responsive information or documents in fact exist; only that, if such relevant, non-privileged, non-objectionable information or documents exist, are in Cisco's possession, custody, or control, and are located after a reasonable search of the location or locations where responsive information or documents are likely to be located, such information or documents will be produced in a timely manner.

25. Cisco further reserves all rights to supplement its responses to Arista's Interrogatories in compliance with the Federal Rules of Civil Procedure, including under Rule 26(e), as well as the Civil and Patent Local Rules of the Northern District of California and any orders governing this Litigation, and as Cisco's investigation and discovery proceeds in this Litigation.

RESPONSES TO INTERROGATORIES

INTERROGATORY NO. 16:

For each CLI Command listed in Cisco's Second Amended Complaint (including exhibits) and each command hierarchy listed in Cisco's Second Amended Complaint (including exhibits), and each command mode and prompt listed in Cisco's Second Amended Complaint (including exhibits), identify: (i) the author or originator of such Command, command hierarchy, command mode and prompt, (ii) the date of such authorship or creation, (iii) the document(s) in which such Command, command hierarchy, command mode or prompt was first fixed in any tangible medium of expression, (iv) the document(s) in which such Command, command hierarchy, command mode or prompt was first published, and (v) the first Cisco product (including version number) that used or responded to each CLI Command, command hierarchy, command mode or prompt.

RESPONSE TO INTERROGATORY NO. 16:

Cisco incorporates by reference its General Objections as though fully set forth herein. Cisco further objects to this interrogatory as compound and unduly burdensome, as it calls for thousands of pieces of information. Cisco further objects to this interrogatory as irrelevant and not calculated to lead to the discovery of admissible evidence to the extent it seeks information not relevant to the copyrightability of Cisco's works-in-suit and seeks information regarding acts not at issue in this suit. Cisco further objects to this interrogatory to the extent that it calls for information that is publicly available or equally available to Arista, and therefore is of no greater burden for Arista to obtain than for Cisco to obtain. Cisco also objects to this interrogatory as undefined, vague, ambiguous, overbroad, and unduly burdensome in its use of the terms "each CLI command," "each command hierarchy," "each command mode and prompt," and "identify." Cisco further objects to this interrogatory to the extent it calls for a legal conclusion. Cisco also objects to this interrogatory to the extent that it is cumulative and duplicative of other discovery sought by Arista, including at least Interrogatory No. 5. Cisco further objects to this interrogatory to the extent it seeks information that is protected by the attorney-client privilege, that constitutes attorney work-product, or that is protected by any other applicable privilege, protection, or immunity, including without limitation in connection with the common interest doctrine.

Subject to and without waiver of the foregoing general and specific objections, Cisco responds as follows:

Cisco incorporates by reference its response to Arista's Interrogatory No. 5 as if fully set forth herein. Because the burden of identifying the information sought by this interrogatory is the same for Arista as it is for Cisco, pursuant to Fed. R. Civ. P. 33(d), Cisco identifies the following documents as containing responsive information:

IOS v. 11.0: Source Code, CSI-CLI-00403865, CSI-CLI-00356391 - CSI-CLI-00356394, CSI-CLI-00356395 - CSI-CLI-00356398.

7 Cisco's discovery efforts in this case are ongoing, and Cisco reserves the right to further
 8 supplement this response in light of facts learned during discovery.

9
 10 **FIRST SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

11 Subject to and without waiver of its general and specific objections, Cisco further responds
 12 as follows:

13 Based on the information presently available to Cisco, the protectable expressions from
 14 Cisco's copyrighted works-in-suit that Arista copied were authored by Cisco, as works made for
 15 hire by Cisco employees. *See* 17 U.S.C. § 201(b). Cisco Pursuant to Fed. R. Civ. P. 33(d), Cisco
 16 directs Arista to the following documents, from which Arista can gather information regarding the
 17 status of its asserted copyright works as works for hire, as well as information regarding the
 18 presumptive validity of Cisco's copyrights and the date on which those works were completed:

19 Convrighted Work	Copyright Application	Copyright Registration

Persons most knowledgeable regarding the creation of those works, including the constituent elements copied by Arista identified by Cisco in response to Arista's interrogatory No. 2, include Kirk Loughheed and Phillip Remaker.

The table below also contains additional information regarding the development of the Cisco command expressions copied by Arista, including identifying the work in which each such command expression first appeared¹ and the date that work was first distributed. This table reflects information currently available to Cisco, and Cisco reserves the right to amend or supplement the information contained in this table as additional information comes to light.

Copied Command Expression	First Operating System	First Distribution Date
aaa accounting	Cisco IOS 10.3	April 13, 1995
aaa accounting dot1x	Cisco IOS 12.4(11)T	November 2006
aaa authentication login	Cisco IOS 10.3	April 13, 1995
aaa authorization config-commands	Cisco IOS 11.2	October 1996
aaa authorization console	Cisco IOS 12.0(6)T	September 20, 1999
aaa group server radius	Cisco IOS 12.0(5)T	July 27, 1999
aaa group server tacacs+	Cisco IOS 12.0(5)T	July 27, 1999
address-family	Cisco IOS 12.0(5)T	July 27, 1999
aggregate-address	Cisco IOS 10	1993
area default-cost	Cisco IOS 10	1993

¹ Each command expression in the table was introduced at least as early as the identified "First Operating System." Records pertaining to command expressions in IOS versions earlier than 10.0 were not kept as systematically as for later versions. Cisco is continuing to search for documentation of earlier versions of its operating systems and will supplement the information in this table if necessary.

Mr. Loughheed is personally knowledgeable about the creation of the following command expressions, for the creation of which he was responsible:

arp timeout
banner login
banner motd
boot system
clear arp-cache
clear ip arp
clear ip bgp
distance bgp
interface ethernet
interface loopback
ip access-list
ip access-list standard
ip address
ip domain lookup
ip domain-name
ip helper-address
ip host
ip name-server
ip route
ip routing
router bgp
router rip
show arp
show hostname
show hosts
show interfaces
show ip access-lists

show ip arp
show ip bgp
show ip interface
terminal length

The table below identifies Cisco hardware products that supported operating systems identified above. The information below is provided with respect to master versions of Cisco's operating systems—not with respect to particular code releases, which information is not kept in the ordinary course of business and is unduly burdensome to obtain. This table reflects information currently available to Cisco, and Cisco reserves the right to amend or supplement the information contained in this table as additional information comes to light.

OPERATING SYSTEM	PLATFORMS
IOS 10.0	Cisco 7000 Series Router
	Cisco 4000 Series Router (including Cisco 4000 and Cisco 4000-M)
	Cisco 3000 Series Router
	Cisco 3101
	Cisco 3102
	Cisco 3103
	Cisco 3104
	Cisco 3204
	Cisco 2500 Series Router (except Cisco 2520 through Cisco 2523)
	AccessPro PC Card for IBM PC
	AGS+ (with a CSC/4 processor board)
	MGS (with a CSC/4 processor board)
	CGS (with a CSC/4 processor board)
	IGS L/R/TR
IOS 10.2	Cisco 7000 Series Router
	Cisco 7010
	Cisco 4000 Series Router (including Cisco 4000, Cisco 4000-M, Cisco 4500, Cisco 4500-M, Cisco 4700)
	Cisco 3000 Series Router (except the Cisco 3202)
	Cisco 2500 Series Router (Cisco 2501 through Cisco 2516)
	Cisco 1000 Series LAN Extender
	AccessPro PC card
	AGS and AGS+ (with a CSC/4 processor board)
	MGS (with a CSC/4 processor board)
	CGS (with a CSC/4 processor board)
IOS 10.3	Cisco 7000 Series Router
	Cisco 4000 Series Router (including Cisco 4000, Cisco 4000-M, Cisco 4500-M, and Cisco 4700)
	Cisco 3000 Series Router (except the Cisco 3202)
	Cisco 2500 Series Router (except Cisco 2520 through Cisco 2525)

OPERATING SYSTEM	PLATFORMS
	Cisco 1000 Series Router (including Cisco 1003, Cisco 1004, Cisco 1005)
	Cisco 1000 LAN Extender
	AccessPro PC Card
	AGS+ (with a CSC/4 processor board)
	MGS (with a CSC/4 processor board)
	CGS (with a CSC/4 processor board)
IOS 11.0	Cisco 1003 ISDN Router
	Cisco 1004 ISDN Router
	Cisco 1005 Router
	Cisco 2500 Series
	Cisco 3000 Series (but not 3202)
	4000 Series Router (including Cisco 4000, 4000-M, 4500, 4500-M, 4700 & 4700-M)
	4000-M Series
	4500 Series
	4500-M Series
	4700 Series
	4700-M Series
	7000 Series Router
	7000 Series with RSP7000 Router platform
	7500 Series Router
	AGS+ (with a CSC/4 processor board)
	MGS (with a CSC/4 processor board)
	CGS (with a CSC/4 processor board)
	ASM-CS Access Server Platform
	2500 Series Access Server Platform
	AS5100 Access Server Platform
IOS 11.1	Cisco 1003 ISDN Routers
	Cisco 1004 ISDN Routers
	1005 Router
	Cisco 1600 Series Routers
	Cisco 2500 Series
	Cisco 3000 Series (except Cisco 3202)
	Cisco 3600 Series Routers
	Cisco 4000 Series (including Cisco 4000, 4000-M, 4500, 4500-M, 4700 & 4700-M)
	Cisco 7000 Series Routers with RSP7000 (Route Switch Processor) & RSP7000CI (Chassis Interface) (including Cisco 7000 & 7010)
	Cisco 7200 Series Routers (including Cisco 7202, 7204 & 7206)
	Cisco 7500 Series Routers ("including" Cisco 7505, 7507 & 75013 [sic])
	1000 LAN Extender
	AS5100
	AS5200 Access Servers
IOS 11.2	Certain features of CPA4500 Router
	Certain features of CPA4700 Router
IOS 11.2	Cisco 1003 ISDN Routers
	Cisco 1004 ISDN Routers

OPERATING SYSTEM	PLATFORMS
	1005 Router
	Cisco 1600 Series Routers (including Cisco 1601, 1602, 1603 & 1604)
	Cisco 3000 Series (except Cisco 3202)
	Cisco 3600 Series Routers (including Cisco 3640 & 3620)
	Cisco 3800 Series
	Cisco 4000 Series Routers (including Cisco 4500, 4500-M, 4700 & 4700-M)
	Cisco 7000 Series (including RSP7000 & RSP7000CI)
	Cisco 7200 (including Cisco 7206 & 7204)
	Cisco 7500 Series (including Cisco 7505, 7507 & 7513)
	Cisco AS2509-RJ & Cisco AS2511-RJ Access Servers
	Cisco AS5100
	Cisco AS5200 Universal Access Server
	Cisco 1000 LAN Extender
	Cisco 2500 Fixed FRAD Series (including Cisco 2501FRAD-FX, Cisco 2501LANFRAD-FX, and Cisco 2502LANFRAD-FX)
IOS 11.3	Cisco 3011 WAN module (a router card that is installed in the Catalyst 3200 switch)
	Cisco 1003 ISDN Router
	Cisco 1004 ISDN Router
	Cisco 1005 Router
	Cisco 1600 Series (including Cisco 1601, 1602, 1603, & 1604)
	Cisco 2500 Series (including Cisco 2501, 2502, 2503, 2504, 2505, 2507, 2516, 2520, 2521, 2522, 2523, 2513, 2514, 2515, 2524, 2525, AS2509, AS2511, AS2512, AS2509-RJ, AS2511-RJ, & 2509-ET)
	Cisco 3011 Router
	Cisco 3600 Series (including Cisco 3640 & 3620)
	Cisco 4000 Series (including Cisco 4000, 4000-M, 4500, 4500-M, 4700, & 4700-M)
	Cisco 7200 Series (including Cisco 7204 & 7206)
	Cisco 7500/RSP Series (including Cisco 7000 equipment with RSP7000 processor; Cisco 7010 equipped with RSP7000 processor; Cisco 7505, 7507, & 7513)
	Cisco AS5100 Access Server
	Cisco AS5200 Access Server
	AccessPro PC Card

Cisco's investigation of the information sought by this interrogatory is ongoing. Cisco therefore reserves the right to supplement its response in the event additional responsive information is identified.

SECOND SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:

Subject to and without waiver of its general and specific objections, Cisco further responds as follows:

Attached hereto as Exhibit F is a table containing information regarding the development of each of Cisco's command expressions that Arista has copied from one or more of Cisco's copyrighted works. The columns of that table include, for each command expression, the following information:

- **Author/Originator Information:** Legal author of the command expression and person(s) who participated in the origination of the command expression.
- **Earliest Known Document:** The first document known to Cisco that contains the command expression.
- **Date of Earliest Known Document:** The date of the first document known to Cisco that contains the command expression.
- **First Operating System:** The earliest known published work to contain the command expression.
- **First Distribution Date:** The date on which distribution of the first published work containing the command expression began.

Exhibit F contains **HIGHLY CONFIDENTIAL – ATTORNEYS' EYES ONLY INFORMATION.**

Pursuant to Fed. R. Civ. P. 33(d), Cisco additionally refers Arista to the documents identified in Exhibit F, from which Arista may obtain information about the development of each of Cisco's multi-word command expressions as easily as Cisco can obtain it:

- Source code identified above is available for review on the designated source code review terminals maintained by Cisco's outside counsel, as agreed between the parties in the stipulated Protective Order (Dkt. 53).
- The Bates ranges for the IOS documents identified in Exhibit F can be found in Cisco's original response to this Interrogatory.

- 1 • The emails identified in Exhibit F are located at CSI-CLI-00608586 to CSI-CLI-
2 00608740.
- 3 • Cisco's internal documents, which are designated with the "EDCS-" or "ENG-"
4 prefixes, can be found at CSI-CLI-00608741 to CSI-CLI-00612427.
- 5 • The "cisco Systems ASM/AGS User Manual and Configuration Guide Version
6 5.2" can be found at CSI-CLI-00358622 to CSI-CLI-00358654.
- 7 • The "cisco Systems AGS User Manual System Version 6.0" can be found at CSI-
8 CLI-00358166 to CSI-CLI-00358223.
- 9 • The "cisco Systems ASM Reference Manual System Version 6.0" can be found at
10 CSI-CLI-00358394 to CSI-CLI-00358451.
- 11 • The "cisco Systems AGS Reference Manual Software Version 6.1" can be found at
12 CSI-CLI-00358298 to CSI-CLI-00358393.
- 13 • The "cisco Systems Gateway Server Reference Manual Revision B" can be found
14 at CSI-CLI-00358722 to CSI-CLI-00358847.
- 15 • The "cisco Systems Gateway Server Update Applications Note GS-9, Revision A"
16 can be found at CSI-CLI-00359132 to CSI-CLI-00359185.
- 17 • The "cisco Systems Terminal Server Update Applications Note TS-6, Revision A"
18 can be found at CSI-CLI-00359229 to CSI-CLI-00359262.
- 19 • The "cisco Systems Release 8.0 Beta Notes Applications Note GS-10, Revision B"
20 can be found at CSI-CLI-00358655 to CSI-CLI-00358722.

21 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
22 burdensome. Cisco has worked diligently to supplement its response with information that is
23 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco's
24 investigation of the subject matter of this interrogatory is ongoing, and Cisco reserves the right to
25 supplement its response pursuant to Fed. R. Civ. P. 26(e).

26
27
28

1 **THIRD SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

2 Subject to and without waiver of its general and specific objections, Cisco further responds
3 as follows:

4 Attached hereto as an amended version of Exhibit F.

5 The command modes and prompts identified in Cisco's response to Arista's Interrogatory
6 No. 2 were created by Kirk Lougheed. Those command modes and prompts were first
7 documented in the "cisco Systems ASM/AGS User Manual and Configuration Guide Version
8 5.2," which can be found at CSI-CLI-00358622 to CSI-CLI-00358654. They were created by at
9 least the date of that document: July 20, 1986.

10 The hierarchical arrangement of Cisco's CLI command expressions was originally created
11 by Kirk Lougheed. That arrangement was first documented in the "cisco Systems ASM/AGS
12 User Manual and Configuration Guide Version 5.2," which can be found at CSI-CLI-00358622 to
13 CSI-CLI-00358654. That arrangement was created by at least the date of that document: July 20,
14 1986. As command expressions were added in subsequent versions of Cisco's copyrighted
15 operating systems, this hierarchical arrangement of command expressions was modified and
16 extended by the addition of each such expression, information about the authorship of which is
17 contained in Exhibit F.

18 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
19 burdensome. Cisco has worked diligently to supplement its response with information that is
20 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco's
21 investigation of the subject matter of this interrogatory is ongoing, and Cisco reserves the right to
22 supplement its response pursuant to Fed. R. Civ. P. 26(e).

23
24 **FOURTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

25 Subject to and without waiver of its general and specific objections, Cisco further responds
26 as follows:

27 Attached hereto as an amended version of Exhibit F.
28

1 The response to the “help” command identified in Cisco’s Fourth Supplemental Response
2 to Interrogatory No. 2 was created by Terry Slattery in version 9.21 of Cisco’s IOS. In addition to
3 the response to the “help” command, Mr. Slattery was responsible for the creation of the context-
4 sensitive descriptions of all Cisco CLI command expressions that existed as of version 9.21 of
5 IOS. The descriptions of subsequent command expressions were created by the originator(s) of
6 those command expressions, which are identified on Exhibit F to Cisco’s response to Interrogatory
7 Nos. 16 and 19. Exhibit F is incorporated by reference as if fully set forth herein.

8 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
9 burdensome. Cisco has worked diligently to supplement its response with information that is
10 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco’s
11 investigation of the subject matter of this interrogatory is ongoing, and Cisco reserves the right to
12 supplement its response pursuant to Fed. R. Civ. P. 26(e).

13
14 **FIFTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

15 Subject to and without waiver of its general and specific objections, Cisco further responds
16 as follows:

17 Cisco’s efforts to provide a complete response to this interrogatory, irrespective of its
18 objections, have been extensive. Over the last 3 months, Cisco has worked with a team of 10
19 senior Cisco engineers to identify the originator of each command, as well as supporting
20 documents, as identified in Amended Exhibit F hereto. Collectively, the engineers have spent
21 hundreds of hours working to identify the originators of each command. Cisco’s engineering team
22 searched several different source code repositories dating back to 1992, using both manual
23 searches and a script that they wrote specifically for this project.

24 Cisco has also spent hundreds of additional hours searching internal Cisco documentation.
25 Cisco performed searches in Cisco’s internal design document repository, Cisco’s internal bug
26 repository, and Cisco’s other document storage systems. Additionally, Cisco interviewed and
27 reviewed the personal document repositories of dozens of Cisco engineers. Though Cisco has
28 identified originators for over 99% of the commands, Cisco continues to investigate the origin of

1 the remaining 4 commands. The results to-date of Cisco's search efforts are contained in
2 Amended Exhibit F. Amended Exhibit F is incorporated by reference as if fully set forth herein.

3 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
4 burdensome. Cisco has worked diligently to supplement its response with information that is
5 reasonably obtainable with significant effort over the course of many months since the Court
6 ordered Cisco to provide its supplementation. Nevertheless, Cisco's investigation of the subject
7 matter of this interrogatory is ongoing, and Cisco reserves the right to supplement its response
8 pursuant to Fed. R. Civ. P. 26(e).

9 **SIXTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

10 Subject to and without waiver of its general and specific objections, Cisco further responds
11 as follows:

12 To facilitate Arista's review of Cisco's confidential source code, in response to Arista's
13 requests, Cisco supplements Exhibit F (incorporated by reference as if fully set forth herein) by
14 providing even more granular detail in its source code file identifications. For each file identified
15 in Exhibit F by a file path, Cisco states that the identified files do not have a file extension
16 identifier because they did not have a file extension identifier in their original form, and the files
17 have been preserved in their original form. In any event, we have preserved their original file
18 directory paths (as identified on Exhibit F) to facilitate swift identification. For those files that had
19 an extension identifier in their original form, at Arista's request, in order to facilitate Arista's
20 matching of source code files identified in Exhibit F and source code files made available for
21 inspection on the source code review computer, we have modified the file names of identically or
22 nearly-identically named files and clarified the extension type for each file on both Exhibit F and
23 the source code computer.

24 Cisco's investigation of the subject matter of this interrogatory is ongoing, and Cisco
25 reserves the right to supplement its response pursuant to Fed. R. Civ. P. 26(e).

26 **SEVENTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

27 Subject to and without waiver of its general and specific objections, Cisco further responds
28 as follows:

1 Attached hereto as an amended version of Exhibit F. Exhibit F is incorporated by reference
2 as if fully set forth herein

3 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
4 burdensome. Cisco has worked diligently to supplement its response with information that is
5 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco's
6 investigation of the subject matter of this interrogatory is ongoing, and Cisco reserves the right to
7 supplement its response pursuant to Fed. R. Civ. P. 26(e).

8
9 **EIGHTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

10 Subject to and without waiver of its general and specific objections, Cisco further responds
11 as follows:

12 Attached hereto as an amended version of Exhibit F. Exhibit F is incorporated by reference
13 as if fully set forth herein

14 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
15 burdensome. Cisco has worked diligently to supplement its response with information that is
16 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco's
17 investigation of the subject matter of this interrogatory is ongoing, and Cisco reserves the right to
18 supplement its response pursuant to Fed. R. Civ. P. 26(e).

19
20 **NINTH SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 16:**

21 Subject to and without waiver of its general and specific objections, Cisco further responds
22 as follows:

23 Cisco identifies at least the following documents and testimony as containing responsive
24 information: Deposition Testimony of Phillip Remaker, Tong Liu, Abhay Roy, Kenneth Duda,
25 Philip Shafer, Anthony Li, Greg Satz, and Kirk Loughed, Hugh Holbrook, Adam Sweeney, and
26 Devadas Patil..

27 Cisco objected to this interrogatory on the grounds that, *inter alia*, it is unduly
28 burdensome. Cisco has worked diligently to supplement its response with information that is

1 reasonably obtainable since the Court ordered Cisco to provide its supplementation. Cisco's
2 investigation of the subject matter of this interrogatory is ongoing. Cisco therefore reserves the
3 right to supplement this response as additional information becomes available, including
4 information that may be the subject of expert testimony and expert discovery.

5
6 **INTERROGATORY NO. 19:**

7 For each CLI Command response that Cisco alleges Arista unlawfully copied, identify:

8 (i) the author or originator of such CLI Command response, (ii) the date of such authorship or
9 creation, (iii) the document(s) in which such CLI Command response was first fixed in any
10 tangible medium of expression, (iv) the document(s) in which such CLI Command response was
11 first published, and (v) the first Cisco product (including version number) that used or responded
12 to each CLI Command response.

13
14 **RESPONSE TO INTERROGATORY NO. 19:**

15 Cisco incorporates by reference its General Objections as though fully set forth herein.
16 Cisco further objects to this interrogatory as compound and unduly burdensome, as it calls for
17 numerous pieces of information. Cisco further objects to this interrogatory as irrelevant and not
18 calculated to lead to the discovery of admissible evidence to the extent it seeks information not
19 relevant to the copyrightability of Cisco's works-in-suit. Cisco further objects to this interrogatory
20 to the extent that it calls for information that is publicly available or equally available to Arista,
21 and therefore is of no greater burden for Arista to obtain than for Cisco to obtain. Cisco also
22 objects to this interrogatory as undefined, vague, ambiguous, overbroad, and unduly burdensome
23 in its use of the term "each CLI Command response." Cisco further objects that this interrogatory
24 is vague, ambiguous, and unintelligible to the extent it requests an "author or originator" of a
25 command response. Cisco further objects to this interrogatory to the extent it calls for a legal
26 conclusion. Cisco also objects to this interrogatory to the extent that it is cumulative and
27 duplicative of other discovery sought by Arista, including at least Interrogatory No. 5. Cisco
28 further objects to this interrogatory to the extent it seeks information that is protected by the

1 attorney-client privilege, that constitutes attorney work-product, or that is protected by any other
2 applicable privilege, protection, or immunity, including without limitation in connection with the
3 common interest doctrine.

4 Subject to and without waiver of the foregoing general and specific objections, Cisco
5 responds as follows:

6 The command responses identified in Cisco's response to interrogatory no. 2 are generated
7 in response to "show" command expressions, which are included in Exhibit E to Cisco's
8 interrogatory responses. The response to each such "show" command expression was originally
9 created in conjunction with the creation of the command expression itself, by the Cisco
10 engineer(s) responsible for developing that command expression, and was present in the version of
11 Cisco's products first including that command expression. Cisco therefore incorporates by
12 reference its response to Arista's interrogatory no. 16 (including Exhibit F), which contains
13 information regarding the creation of Cisco's "show" command expressions.

14 Cisco's investigation of the subject matter of this interrogatory is ongoing. Cisco therefore
15 reserves the right to supplement this response as additional information becomes available.

16
17 **SUPPLEMENTAL RESPONSE TO INTERROGATORY NO. 19:**

18 Subject to and without waiver of its general and specific objections, Cisco further responds
19 as follows:

20 Cisco identifies at least the following documents and testimony as containing responsive
21 information: Deposition Testimony of Phillip Remaker, Tong Liu, Abhay Roy, Kenneth Duda,
22 Philip Shafer, Anthony Li, Greg Satz, and Kirk Loughheed, Hugh Holbrook, Adam Sweeney, and
23 Devadas Patil..

24 Cisco additionally incorporates its response to Arista's Interrogatory No. 16 (including
25 each and every version Exhibit F, up to and beyond Cisco's Supplemental Eighth Exhibit F),
26 which contains information regarding the creation of Cisco's command expressions.

1 Cisco's investigation of the subject matter of this interrogatory is ongoing. Cisco therefore
2 reserves the right to supplement this response as additional information becomes available,
3 including information that may be the subject of expert testimony and expert discovery.
